DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:
Regarding independent claim 1, the prior art fails to disclose or make obvious a time of flight mass spectrometer comprising a source of continuous ionization and timing means for detecting the time of release of a secondary electron and using the release time of the secondary electron as the start time for the time of flight of the corresponding ion in a TOF mass spectrometer.
Claims 2-21 are allowed by virtue of their dependency on claim 1.
The main feature that separates the TOFMS apart from prior art is deriving a signal from secondary electrons released at time of ionization of an atom or molecule and using this as a start signal for measuring the flight time of the ionized atom or molecule in a TOF-MS.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"

Relevant Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
Pierrejean et al. (JP 02000348665) and Pierrejean et al. (USPN 6545269) disclose using a pulsed electron beam to ionize molecules.
